dentistry  
symposium

HANDS ON 12 DEC

**ANTERIOR COMPOSITES BY  
DR VISHAL GUPTA**

lecture followed by  
polychromatic layering for  
Class IV restorations,  
including putty index  
fabrication, opalescence  
and polishing techniques

HANDS ON 13 DEC

**POSTERIOR BONDED  
RESTORATIONS BY  
DR IRFAN KACHWALA**

lecture followed by  
preparation  
techniques for inlays,  
onlays, crownlays and  
endocrowns

HANDS ON 14 DEC

**PORCELAIN VENEERS BY  
DR MANAV KALRA**

lecture followed by a  
guided tooth preparation  
and temporization for  
porcelain veneers

All hands on exercises under magnification, provided by **UNIVET**

**ivoclar**

**kataradental®**  
PUTS THE SMILE BACK ON®

**adhesive  
dentistry**  
symposium

This course is ideal for general dentists and specialists who want to elevate their aesthetic outcomes using adhesive dentistry. Whether you're a recent graduate or an experienced clinician, you'll gain practical, evidence-based skills that can be seamlessly integrated into everyday practice.

12 DEC 9 AM TO 5 PM

**ANTERIOR COMPOSITES BY  
DR VISHAL GUPTA**

Creating aesthetic and functional anterior composites requires precision and a deep understanding of technique. In this interactive lecture and hands-on session, Dr Vishal will demystify the process, guiding participants through essential steps to consistently deliver beautiful, long-lasting anterior restorations.

13 DEC 9 AM TO 5 PM

**POSTERIOR BONDED  
RESTORATIONS BY  
DR IRFAN KACHWALA**

Full-coverage crowns are no longer the only solution for compromised or endodontically treated teeth. Dr Irfan will showcase how modern adhesive protocols and minimally invasive techniques allow for strong, indirect bonded restorations. Learn how to approach posterior teeth more conservatively - without compromising durability or function.

14 DEC 9 AM TO 5 PM

**PORCELAIN VENEERS BY  
DR MANAV KALRA**

A complete immersion into the world of porcelain veneers where Dr Manav will walk you through case selection, preparation techniques, material selection and bonding workflows. With a blend of theory and hands-on training, this session is designed to equip clinicians with the skills and confidence to deliver stunning, predictable results.
