DR VISHAL GUPTA**

lecture followed by
restoring class II defect
with centripetal build and
subtractive modelling
technique

HANDS ON 03 OCT

**POSTERIOR BONDED
RESTORATIONS BY
DR IRFAN KACHWALA**

lecture followed by
preparation
techniques for partial
onlays and overlays

HANDS ON 04 OCT

**PORCELAIN VENEERS BY
DR MANAV KALRA**

lecture followed by a
guided tooth preparation
and temporization for
porcelain veneers

ivoclar

UNIVET

**adhesive
dentistry**
symposium **2.0**

Whether you're a recent graduate or an experienced clinician, you'll gain **practical and evidence-based skills** that can be seamlessly integrated into everyday practice.

02
OCT 26

**POSTERIOR COMPOSITES BY
DR VISHAL GUPTA**

Restoring posterior teeth with directly placed bonded composite requires a precise and systematic technique for long-term success.

9 AM TO 5 PM
Dr. Vishal will simplify the complete clinical workflow - from case and material selection to cavity preparation, matrix systems, isolation, bonding and management of polymerization shrinkage.

03
OCT 26

**POSTERIOR BONDED
RESTORATIONS BY
DR IRFAN KACHWALA**

Full-coverage crowns are no longer the only solution for compromised or endodontically treated teeth. Dr Irfan will showcase how modern adhesive protocols and minimally invasive techniques allow for strong, indirect bonded restorations. Learn how to approach posterior teeth more conservatively - without compromising durability or function.

9 AM TO 5 PM

04
OCT 26

**PORCELAIN VENEERS BY
DR MANAV KALRA**

A complete immersion into the world of porcelain veneers where Dr Manav will walk you through case selection, preparation techniques, material selection and bonding workflows. With a blend of theory and hands-on training, this session is designed to equip clinicians with the skills and confidence to deliver stunning, predictable results.

9 AM TO 5 PM
